Why Heavy Equipment Armor?

Who is Heavy Equipment Armor?

Heavy Equipment Armor was founded by the owner of Advanced Forest Equipment, Engineer of the original disc mulcher for skid steers. Being a mulching contractor for over 36 years, and safety always being a priority, he designed and built custom guarding to protect his operators and equipment. Eventually, this guarding became available to purchase through Advanced Forest Equipment. Due to the inquiries received about heavy equipment guarding, it became apparent there was a need in the industry that was not being filled; Heavy Equipment Armor was established. Guarding that was available through Advanced Forest Equipment is now under the HEA name. With new guarding products continually being engineered and coming to the market.

What types of guarding are currently offered?

HEA manufactures steel guarding and UL752 Level 1 ballistic guarding for CAT skid steers and excavators. Bolt on steel front door guards and cab guards are available for skid steers. HEA manufactures enhanced guarding for both skid steers and excavators.

For excavators, we deliver a bolt-on line of guarding products that include steel front window screens, top guards, and rock guards, and a bolt on UL752 Level 1 ballistic front window. Custom cab guard packages include running boards, light kits, box guards and more are available. Custom guarding is fabricated to the machine at our Northern Idaho facility.

What makes HEA different from other guarding manufactures?

HEA products are designed to fit each model of machine specifically. Our products are not a universal fit or cookie cutter fit. This allows for the best potential fit. HEA polycarbonate products are made of UL752 Level 1 polycarbonate that can stand a ballistic attack. They are not milled or drilled. Most polycarbonate, offered by other companies are not ballistic rated, they are only impact rated and have been milled and drilled to fit hinges and handles. Milling & drilling polycarbonate leaves it susceptible to micro-fractures.

SKELETON FRONT DOOR GUARD

There are two different skeleton steel front door guards, the only difference between the two is the screen spacing. They both easily mount up to the factory CAT polycarbonate door, on the CAT Skid Steer "D" Models. Installation time is approximately 1 hour. PLEASE NOTE: These door guards are intended as a brush guard only. They are NOT certified fops/rops guard.

PART #CAT-DG5

5x5" Skeleton Front Door Guard

PART #CAT-DG2.5

2.5x5" Skeleton Front Door Guard

View From Inside Looking Out

The Skeleton Front Door Guard for CAT skid steers installs easily onto the skid steer using factory hardware from your original door, including hinges, lock system and emergency escape system. Integrated push bumper system spreads weight of door over cab, keeping weight off the hinges. (This is shown in Figure 1)

SKELETON FRONT DOOR GUARD fits most "D" model skid steers. Be safe knowing you have added protection to your front poly-carbonate door.

PLEASE NOTE: This guard is intended as a brush guard only. It is not a certified FOPS/ROPS guard.
